

Induction Calls

New ePAG advocates, potential volunteers, or other ERN members

Resource for Managing and Supporting Patient Partnership in the European Reference Networks (ERNs)

01 Purpose

Induction sessions are organised to equip new patient advocates with the knowledge they need to effectively fulfill their role. These sessions cover general aspects of ERNs and the role of European Patient Advisory Group (ePAG) advocates.

02 How to attend it

EURORDIS schedules two induction sessions per year. EURORDIS contacts ePAG leads twice a year to compile a list of participants and invites them to the online session.

03 Why attend it

These sessions provide participants with essential information on ERNs, their roles, EURORDIS support, and where to find helpful resources. For a successful onboarding, it is crucial that each ERN organises its own onboarding sessions for new ePAG advocates, as EURORDIS induction sessions do not cover the specificities of individual ERNs.
