

Workshop Toolkit: Patient Involvement in CPGs

**Patient representatives
and clinicians in the ERNs**

Resource for Implementing Patient Partnership in the European Reference Networks (ERNs)

01 Purpose

Toolkit to help ERNs plan and deliver a face-to-face workshop for patient representatives and clinicians, enabling them to learn interactively about the development of Clinical Practice Guidelines (CPGs) and how the patient voice can be incorporated throughout the process.

02 How to use it

The toolkit includes three key materials to plan and deliver the workshop: 1) A brief description of the workshop stages; 2) Facilitator's instructions; 3) Information sheet for workshop participants.

Through interactions with other participants and the guidance of a facilitator, participants will explore the different stages of CPGs and the opportunities for patient involvement.

03 Why use it

This workshop provides participants with an interactive opportunity to learn or refresh their knowledge on how and when to involve patient representatives and the broader patient community in the development of CPGs.
