THE IMPACT OF LIVING WITH A RARE DISEASE: BARRIERS AND ENABLERS OF INDEPENDENT LIVING AND SOCIAL PARTICIPATION

A Rare Barometer survey

Target population:

- People living with a rare or undiagnosed condition
- Family members of those living with a rare disease

10 July - 8 September 2024

10,478 respondents worldwide and

9,591 in Europe

25 languages

DASHBOARD FOR EUROPE

HOW TO USE THIS DASHBOARD

In this dashboard, you will find results for every question of the Rare Barometer survey on the opinion of people living with a rare disease on newborn screening.

Please do not use results of guestions for which there are less than 30 respondents.

Please refer to Rare Barometer or add the Rare Barometer logo when using the results.

LANGUAGES

You can change the language at the bottom left of this page and have access to the questions and modalities as they appeared to respondents in the 25 languages of the survey.

The translation is not available for new variables that were calculated after the questionnaire was closed and for some comments added in this dashboard.

INFORMATION

For more information:

- contact the Rare Barometer team at rare.barometer@eurordis.org
- visit the Rare Barometer website at eurordis.org/voices
- visit our newborn screening-dedicated webpage: eurordis.org/rarebarometer-survey

LIST OF CONTENTS

- 1. Sample information
- 2. Disabilities: disability rates; diversity, complexity and severity of disabilities
- 3. Disability assessment and barriers
- 4. Independent living: public support, personal assistance and living arrangements
- 5. Social participation: discrimination, employment, school participation, community participation and social environment

MORE ON THE SURVEY

Research questions and in-depth analysis of European results are in the full report in English: tiny.cc/survey/RB DailyLife

Key results are available in the factsheets: tiny.cc/RB DailyLife Results

Disability rates; diversity, complexity and severity of disabilities

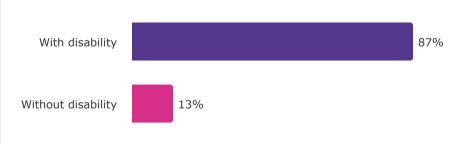

The Washington Group Short Set on functioning assesses the difficulty experienced by people living with rare diseases in doing six activities: seeing, hearing, walking or climbing steps, remembering or concentrating, self-care, communication.

Disability rate: Washington group short set (WGSS)

	N	%
With disability	8,351	87%
Without disability	1,240	13%
TOTAL	9,591	100%

Disability rate: Washington group short set (WGSS)

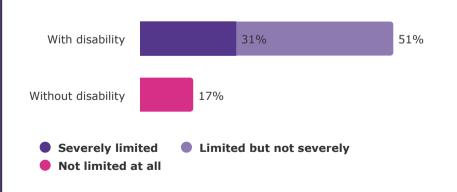

The Global Activity Limitation Index (GALI) measures disability through activity limitations that an individual experienced in the last 6 months or more due to a health problem.

During the last 6 or more months, have you been limited in performing activities that people usually do because of a health problem? Would you say...

	N	%
▼ With disability	7,790	83%
Severely limited	2,964	31%
Limited but not severely	4,826	51%
▼ Without disability	1,652	17%
Not limited at all	1,652	17%
TOTAL	9,442	100%

During the last 6 or more months, have you been limited in performing activities that people usually do because of a health problem? Would you say...

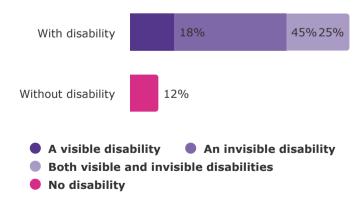

People living with rare diseases were asked if they perceive themselves as living with a disability, be it invisible, visible or both.

Do you consider yourself as a person with...?
