Collaborating for Success

• Successful Collaborations
• Patient Involvement in HTA
• Elements of Success?

• Views are my own
Collaboration

The process of two or more people or organizations working together to realize or achieve something successfully. Collaboration is very similar to, but more closely aligned than, cooperation.

Most collaboration requires leadership, although the form of leadership can be social within a decentralized and egalitarian group.

Successful collaboration
Successful collaboration

PPL Therapeutics

Ministry of Agriculture

Ethics and Legal underpinning
Elements of success

• Identifying a problem
• Thinking widely about what might work
• Cross-sectoral working
• Developing a prototype
• Refining the model with all stakeholders - reflecting on what works well/challenges
• Engaging the public
### Collaboration vs decisions? Managing expectations

What does the treatment effect mean in real life?

What are the long-term effects of treatment?

Patient-Based Evidence - Qualitative Evidence Synthesis, Preference Studies

Who will benefit most from this medicine?

Organisation of Managed Access Agreement

Value judgements to address uncertainty

HTA

Clinical research

Reimbursement recommendation
Scientific
More robust and comprehensive approach to HTA that incorporates social values and ethics, as well as patients’ problems, lived experiences, outcomes, and preferences.

Instrumental
Making better quality decisions across all stages of HTA.

Democratic
More informed, transparent, accountable, and legitimate decisions.

Developmental
Increasing public understanding of HT and HTA, and strengthening public/patient capacity to contribute to HT policy issues.

Theorized Goals of Public and Patient Involvement in HTA
Final Report from the OHTAC Public Engagement Subcommittee. April 2015

Not about access!
Elements of success

• Honesty about what can be achieved, limitations, challenging behaviours
• Commitment to enable all stakeholders to be effectively involved
• Recognition of burden on patient groups vs uncertainty about value of input
• Review and feedback about sustainable approaches as views and processes evolve (including social, ethical, legal reflection)
• Consistency across all Member States (EUnetHTA guidance on participation?)
• Building relationships (trust)
• Leadership
